Subject: Microsoft Settlement

To whom this may concern,

The settlement accepted by Microsoft should be accepted by the Court and Microsoft should be afforded quiet enjoyment to innovate and pursue its business.

The entire case against Microsoft is study of abuse of government power against the private sector - Microsoft drove our high tech economy and dramatically increased productivity in America. We owe the success of the 90's to the catalyst "Microsoft". Bill Gates and his team are the new American heroes of our capitalist system, Microsoft brought low priced products to the service of all. Microsoft succeeded against all competitors world wide -- they won the Olympic Gold of Business for America and the American government tried to punished them due to complaints from inefficient high price competitors with friends in Congress.

It is time to end this tragic mistaken case and move on. In addition to settlement the Federal government and especially the States should apologize to Microsoft and its shareholders.

God Bless a Free America
